

Join our Symposium

Improving patient care through innovative thrombosis and haemostasis testing

LumiraDx: Microfluidic Technology in POC Testing

Monday 11 July, 13:15-14:30
ICC Capital Suite 1

The symposium will present the LumiraDx next-generation point of care diagnostics Platform focusing on our D-Dimer and INR assays*.

Dr Matt Fay will present innovative POC applications in primary care and then Professor Rick Body will share the latest data on D-Dimer in the VTE pathway.
